51. A memorandum of understanding (MOU or MoU) is a document describing a bilateral or multilateral agreement between parties. It expresses a convergence of will between the parties, indicating an intended common line of action. It is often used in cases where parties either do not imply a legal commitment or in situations where the parties cannot create a legally enforceable agreement. (Source: [http://en.wikipedia.org/wiki/Memorandum\\_of\\_understanding](http://en.wikipedia.org/wiki/Memorandum_of_understanding).)
52. *Bandh*, originally a Hindi word meaning "closed," is a form of protest used by political activists in some countries in South Asia like India and Nepal. During a *Bandh*, a major political party or a large chunk of a community declares a general strike, usually lasting one day. Often *Bandh* means that the community or political party declaring a *Bandh* expects the general public to stay in their homes and strike work. (Source: <http://en.wikipedia.org/wiki/Bandh>.)

23. CRS and BSP refer to electronic information and commercial interfaces, typically between airlines and travel agents. A CRS is a system that stores and retrieves air transport data for airlines and enables a transactional interface with travel agents and online consolidators. Similarly, according to the International Air Transport Association (IATA), a BSP is the central point through which data and funds flow between travel agents and airlines. Instead of every agent having an individual relationship with each airline, all of the information is consolidated through the BSP. Agents make one single payment to the BSP (remittance), covering sales on all BSP airlines. The BSP makes one consolidated payment to each airline, covering sales made by all agents in the country/region.
