Contents at a Glance

Introduction 1

Part I: The Questions 5

Chapter 1: Algebra Review 7
Chapter 2: Trigonometry Review 17
Chapter 3: Limits and Rates of Change 29
Chapter 4: Derivative Basics 43
Chapter 5: The Product, Quotient, and Chain Rules 49
Chapter 6: Exponential and Logarithmic Functions and Tangent Lines 55
Chapter 7: Implicit Differentiation 59
Chapter 8: Applications of Derivatives 63
Chapter 9: Areas and Riemann Sums 75
Chapter 10: The Fundamental Theorem of Calculus and the Net Change Theorem 79
Chapter 11: Applications of Integration 87
Chapter 12: Inverse Trigonometric Functions, Hyperbolic Functions, and L'Hôpital's Rule 99
Chapter 13: U-Substitution and Integration by Parts 107
Chapter 14: Trigonometric Integrals, Trigonometric Substitution, and Partial Fractions 113
Chapter 15: Improper Integrals and More Approximating Techniques 121

Part II: The Answers 125

Chapter 16: Answers and Explanations 127
